EXPLANATORY NOTES FOR THE 1926 NATIONAL GUARD REGISTER

1. *Publication.*—"The Chief, Militia Bureau, will publish from time to time an official register of the National Guard." The National Guard Register is a directory designed to show the classification of National Guard officers as to assignment and record of service.

2. *Arrangement.*—The main body of the Register is arranged in alphabetical order of States, showing the recognized organizations and the officers belonging thereto. In each State the names of recognized National Guard officers are followed by those of officers in the National Guard Reserve. Each page is arranged in two columns separated by a vertical line. Organizational designations and the names of officers appear in the first column and the corresponding history or record of service in the second column.

3. *Data.*—The first column shows the organization and its station, the names of officers belonging to the organization, and certain data on each officer to include his grade, the State and date of his birth, service awards, college or university degrees, General Staff Corps status, graduation at standard service schools, and his present status in the Officers' Reserve Corps. The second column shows the history of each organization and each officer's record of service.

4. *Chronological data.*—It is contemplated that the chronological data of each organization shall eventually include its origin, station, designations, redesignations, Federal service, and date of Federal recognition, but because of insufficient space such history for the present is generally limited to date of Federal recognition and redesignations since the World War.

5. *Service.*—The record of service includes enlisted and commissioned service in the Organized Militia or the National Guard, and in the authorized Federal forces. Prior to July 1, 1916, officers are credited with State service while serving under appointment by the State; subsequent thereto credit for commissioned service is given while in a Federally recognized status. Service at the Military or Naval Academy is included. OTC or SATC service is shown except where such service overlaps enlisted or commissioned service. Inactive service in the enlisted reserve forces of the Army is omitted. National Guard Reserve service is omitted except the date of last entrance in a commissioned status.

6. *Form.*—A record that includes both enlisted and commissioned service is shown in two separate blocks. The service in each block is arranged in chronological order of dates. Enlisted service appears in italics and commissioned service in roman type.

7. *Style.*—Punctuation is reduced to a minimum, abbreviations are used to the maximum. The record of service is limited to grade, branch, and inclusive dates. Each period of service includes such data. All grades authorized in the applicable branch of service are used excepting private first class, bugler, and specialists, ratings; those are shown as privates. No reference is made to the organizations in which an individual served or to the manner of separation from service. The word "to" indicates a termination of service. Each period of service is continuous from date of entrance until terminated on the date following the word "to" except in some cases of a last enlistment period preceding commissioned service. Service in the Federal forces, in the ORC, and in forces or States other than the National Guard of the individual's present State appears in brackets. Active service in the Army, Navy, or Marine Corps is indicated by "F" and service in other Federal forces is indicated by appropriate abbreviations. The style adopted attempts to prevent an overlap of service as to dates or class.

8. *Brackets.*—Brackets are used as follows: In the first column to show a commission in a lower grade authorized in lieu of one in a higher grade, and to show the latest status in the Officers' Reserve Corps; in the second column to show service in the ORC, Federal forces, and all other forces except Organized Militia or National Guard service in the individual's present State. A period of State service that runs concurrently with Federal service is interrupted but not broken by brackets.

9. *ORC.*—The latest acceptance of appointment or reappointment in the Officers' Reserve Corps appears in brackets in the first column and shows the branch, grade, date, and serial number. ORC service that does not overlap commissioned service in the National Guard is shown in the second column, otherwise ORC service running concurrently with other commissioned service appears in the first column only. No overlap of service ordinarily occurs except where an ORC commission is held during an enlistment period. ORC service appearing in the second column is continuous except where a termination is stated. Ordinarily promotions in the ORC are omitted in the second column. Periods of active duty under reserve commissions are indicated by appropriate notations.

10. *Longevity.*—The longevity pay of officers is based on commissioned service only. An effort has therefore been made to limit service in the commissioned block to such as counts for longevity purposes. Full time is authorized for commissioned service in the Organized Militia or the National Guard, or in the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, Public Health Service, Naval Militia, or National Naval Volunteers. Full time is allowed for active duty and one-half time for inactive duty under reserve commissions held in the Naval Reserve Force, Marine Corps Reserve Force, Public Health Service Reserve, and the Officers' Reserve Corps. Service in the National Guard Reserve does not count for longevity purposes.

11. *Pay.*—Officers will be entitled to longevity pay in accordance with the record of commissioned service stated in the latest edition of the National Guard Register or amendments thereto issued on MB Form 3-d. Such record is conclusive and final in the determination of all questions as to prior service. Longevity pay is not authorized for armory drills.

12. *Vacancies.*—Vacancies are shown for allotted organizations. Vacancies in commissioned grades are shown for a recognized organization or for an authorized allotment of commissioned personnel. A commission in a lower grade authorized in lieu of one in a higher grade is shown for the higher grade in brackets under the individual's name and indicated by the words "in lieu of."

13. *Instructors.*—The names of Regular Army officers commissioned in the National Guard are shown in the Register with the organizations to which assigned. The data on such officers will be limited in the first column to name and National Guard grade, with Regular Army grade and branch under the name. The second column shows only grade branch, and date of National Guard commission.

14. *Corrections.*—Errors and omissions should be reported by individual officers to the Chief, Militia Bureau, through the State adjutant general, who should verify the corrected statement of service.

15. *Addresses.*—The Militia Bureau does not maintain a directory of the home addresses of National Guard officers. The official address of an officer is the organization to which he is assigned or through the adjutant general's office of his State.

16. *Abbreviations.*—The use of abbreviations is restricted to those published in regulations. As a means of ready reference the following are given:
